

## Preserve and Protect Health Coverage for Utah Children and Families

Medicaid, CHIP (the Children's Health Insurance Program) and the Affordable Care Act (ACA) form the foundation of children's health coverage. These programs are deeply connected to one another and our overall state safety net system. Federal and state lawmakers are proposing and enacting proposals that undermine ACA, CHIP and Medicaid. A repeal, cut or restructure of one program affects the others, and puts the care of Utah children and families at risk.

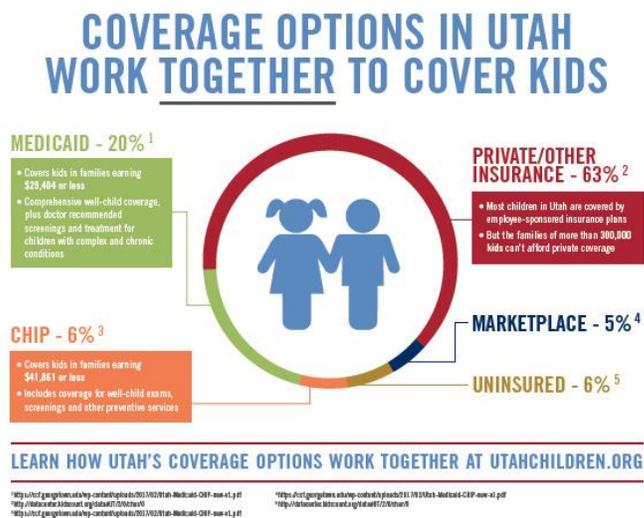

Thanks to the ACA, Medicaid and CHIP, we have seen the rate of uninsured Utah children drop from 11% in 2011 to a historic low of 6% in 2016. We cannot afford to let child health coverage, adequacy, and affordability move backwards. We must ensure that we sustain and build on our unprecedented success in covering children.

**Medicaid is the cornerstone for children's health coverage.** Our state leaders must support the continued stability and affordability of the Medicaid program. Medicaid is the safety net health care program for low-income children. Over 200,000 Utah children rely on Medicaid insurance coverage, and its pediatric benefits are considered the gold standard for child health, particularly for children and youth with special health care needs. Changes to Medicaid's financing structure through a block grant or per capita cap would undermine the program's integrity by creating gaps in state funding. They would likely lead to limits placed on the programs, such as a reduction in benefits or fewer kids covered. Proposals to promote state innovation need to strengthen our safety net for kids and families, not weaken it.

**Block grants or per capita caps would undermine Medicaid program integrity.** Changes to Medicaid's financing structure through a block grant or per capita cap would create large shortfalls in state funding. [Learn more about how block grants would harm Utah's budget.](#)

**Extend funding for CHIP for at least five years.** A robust, long-term extension of CHIP funding for at least five years would help stabilize coverage for the 8.9 million U.S. children who rely on CHIP and provide certainty to Utah amid potentially significant changes to the broader coverage landscape. [Learn more about CHIP.](#)

**Children must not lose any ground.** Unraveling the ACA without a replacement plan attached threatens the health of children and families. There are 38,000 Utah children enrolled in ACA, or marketplace, coverage. At least 87% of Utahns enrolled in the exchange are receiving subsidies. The ACA provides protections for children and families, increases affordability and establishes evidence-based essential health benefits.

**Extend Medicaid Coverage for Parents.** Medicaid coverage for parents benefits the whole family. Yet thousands of Utah families are unable to receive Medicaid coverage, falling into the Medicaid ‘coverage gap.’ As a result, the family is at increased financial risk. Moreover, children are more likely to be uninsured. It is time to close the coverage for all parents and individuals. [Learn more about citizen initiatives to close the coverage gap.](#)

Working families depend on these vital health care programs. What is at stake if the ACA is repealed without a replacement, or changes are made to CHIP and Medicaid?

- The number of uninsured Utah children would more than double. By 2019, at least 141,000 children would be uninsured.
- The number of uninsured Utah parents would jump from 82,000 to 171,000. Research shows that children are better off when their parents have health insurance coverage.
- Families and individuals would lose protection from exclusions and discrimination. Approximately 1.2 million Utahns – including 411,000 children- no longer experience lifetime limits on coverage now that the ACA is in effect.

We are putting our children’s future at risk by failing to guarantee Utah children and families have stable health insurance coverage. All children and families need consistent, comprehensive and affordable care.
