

# Measures of Child Well-Being in Utah, 2020

## *Invest in Utah's Kids*

## *Ensure Utah's Future*

# Acknowledgements

Voices for Utah Children could not have produced this report without the assistance of numerous people, agencies and organizations. The publication was authored by Terry Haven, Deputy Director at Voices for Utah Children, with assistance from Sara Gunderson at Voices for Utah Children and the following agencies:

- Lesley Lundeberg - Utah Department of Human Services
- Mollie Murphy Dale - Utah Department of Workforce Services
- Malia McIlvenna - Utah Board of Education
- Jessica Payne - Utah Department of Health
- Mark Knold - Utah Department of Workforce Services

We would also like to thank Jaime Wood for her research on new indicators and sources.

We thank our funders for their generous support for this report. The findings and conclusions in this report, however, are solely those of Voices for Utah Children, as are any errors or omissions.

# Introduction

Invest in Utah kids. Seems like such a simple thing to do. And we know that we must invest in kids if we want to have a strong and healthy state. Aside from all the right reasons to invest in kids - like making sure they get enough to eat to grow healthy and strong, adequate health care to ensure their minds and bodies can mature, and families that are economically secure so that children can thrive – there is also the fact that we must invest in kids so that Utah has enough productive, capable, and educated adults to keep our economy and our population strong.

Utahns are deeply concerned about the future we leave for our children and how we can ensure that children are equipped to lead our state and our nation as they grow into adults. It's in all of our interest to make kids a state priority, and to invest in kids, the same way good parents make them a family priority.

Consider this. The dependency ratio is the population ages 0-17 and 65-plus per 100 persons ages 18-64. In other words, the percentage of people who are not contributing to the tax base, work force, economy, etc, and who are dependent upon those who are. Utah's dependency ratio was 68.5 in 2018 and was higher than the nation. This dependency ratio is projected to rise in the next 50 years, mostly due to an increase in the retirement age population. In fact, the share of the population ages 65 and older is projected to double over the next 50 years, rising from 10.2 percent of the population in 2015 to 21.3 percent in 2065.<sup>1</sup>

This means that in the years to come, there will be more individuals dependent upon a strong productive work force and that work force will need to be educated and ready to fill the jobs that are available. To be ready for the future we need to invest in kids today. We need to make the right policy decisions today to help children in all Utah families reach their full potential. One of the best ways to make those good decisions is to make sure we have accurate, accessible data on children and their families.

The Utah KIDS COUNT Project is built around the idea that data helps us tell the story of our communities, makes us aware of problems, and brings to the forefront a discussion of the policy solutions that can make a difference in outcomes for kids. Our policy choices reflect our priorities and our priorities should be based on fact -- solid, reliable, accessible data on how kids are doing in our state. This annual publication, "Measures of Child Well-Being in Utah" is a first step in the process.

But how can collecting data help kids? Data can help policymakers and advocates identify problems that require action. Data can identify successful policies that should be continued or expanded. As resources become more

limited, data can help policymakers track whether taxpayer dollars are being effectively invested to maximize limited resources. Data also helps service providers prove the need for programs as they write grants to support Utah's children and their families. Data counts and helps us make KIDS COUNT. We hope this publication is useful as you work to ensure that our state invests in kids and creates a thriving state for the future.

Terry Haven, Deputy Director

## A note on the data and the COVID Pandemic

There is always a lag in data collection which means that the data presented in the data book is often several years behind. Given the effect that COVID has had on many child well-being indicators such as unemployment, poverty, and a myriad of health indicators, it is important to note that some of the indicators in this publication may look very different at this point in time. The Annie E. Casey recognizes the importance of how COVID has affected children and there is now a COVID section of data on the Data Center. The data is from the U.S. Census Bureau's Household Pulse Survey. You can learn more about this data on page 17 in this publication.

# Safe Communities

Abuse Data (per 1,000 children)	<b>FY 19</b>
Rate	10.7
Total number of victims	9,884

## **SHARP Survey Results (self-reported) 2019**

Youth said they had:

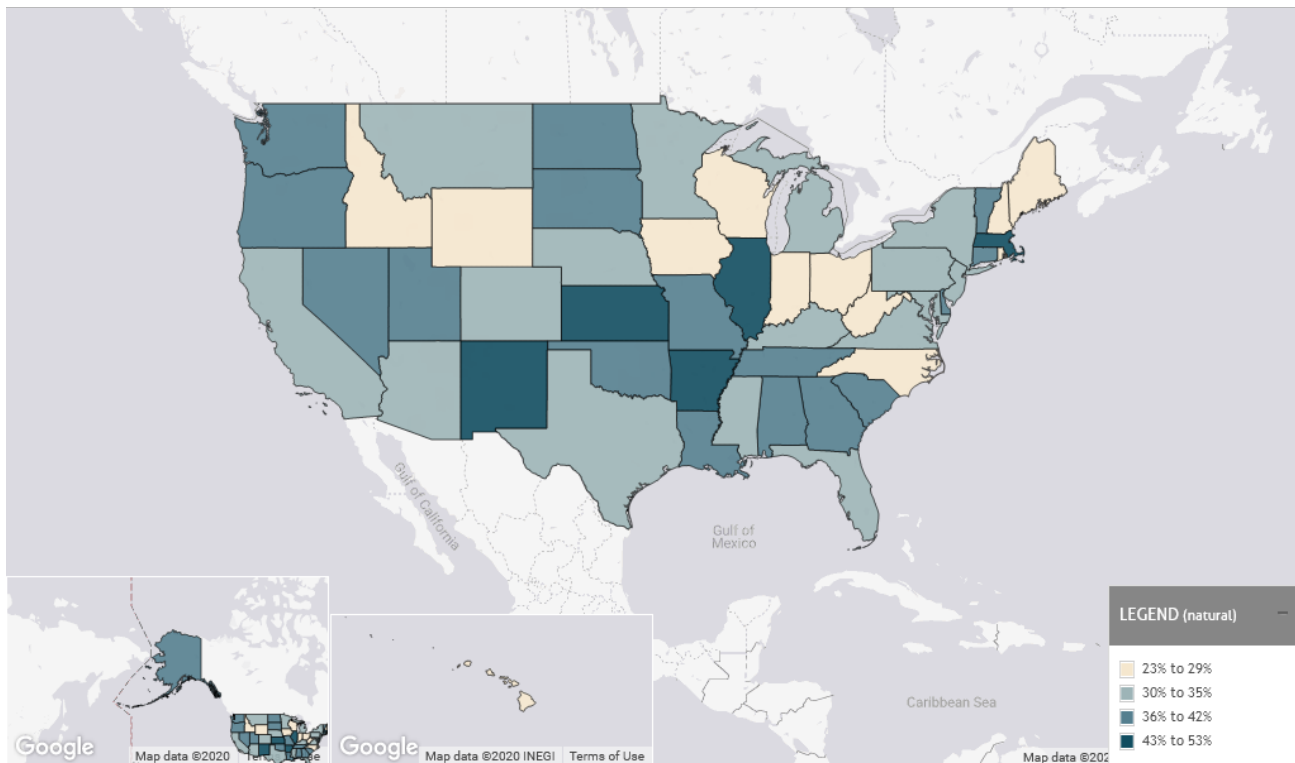

Been drunk or high at school	6.3
Carried a gun to school	0.2
Carried a handgun	8.8
Drank and drove	1.4
Sold illegal drugs	2.1
Stole a vehicle	1.0
Was suspended from school	5.6
Was bullied at school	27.7
Considered suicide	16.4
Missed school because they felt unsafe	10.7
Needed alcohol or drug treatment	4.1
Had high mental health treatment needs	19.3

## **Oct. 1, 2018 - Sept. 30, 2019**

Per 10,000 population age 10 - 17

Juvenile arrests	452
Refer to juvenile court	985
Cases involving locked detention	98
Cases involving community placement	20
Cases involving secure care	14

# Utah and the Nation

## Children In Foster Care With More Than Two Placements (Percent) - 2018

National KIDS COUNT  
KIDS COUNT Data Center, [datacenter.kidscount.org](http://datacenter.kidscount.org)  
A project of the Annie E. Casey Foundation

# Racial Disparities in Safe Communities

	Non-Hispanic White	Hispanic or Latino	American Indian	Pacific Islander	Asian	Black
Percent Children in foster care with more than two placements, 2018	39	42	44	34	*	57
	Arrest	Court Referral	Locked Detention	Community Placement	Secure Care	
Racial/Ethnic Disparities in Juvenile Justice Relative Disparity, 2019**	2.2	2.1	3.6	3.7	5.2	

\* This dataset combines Asian and Pacific Islander into one category.

\*\* Relative disparity indicates the ratio of minority to white youth, i.e. the relative disparity of 2.2 for arrests indicates that minorities are arrested slightly more the twice as often as white youth. Source - The Commission on Criminal and Juvenile Justice

Other Data Source: The Annie E. Casey Foundation, KIDS COUNT Data Center, [datacenter.kidscount.org](http://datacenter.kidscount.org)

# The KIDS COUNT Data Center

All of the Utah KIDS COUNT indicators (including those not published in this report, as well as data from the National KIDS COUNT project) are housed on the Data Center.

From [datacenter.kidscount.org](http://datacenter.kidscount.org) you can:

- Rank states, Utah counties, and the 50 largest cities in the U.S.
- Create a customized data profile for your county.
- Generate your own customized maps and trend lines that show how Utah children are faring and use them in presentations and publications.
- Feature maps and graphs on your own website or blog that are automatically updated when new data is uploaded.
- View and share data quickly and easily anytime and anywhere with the enhanced mobile site for smart phones at [mobile.kidscount.org](http://mobile.kidscount.org).

We encourage you to use the data to tell the story of your community and bring about positive change. Meeting the health, educational, and social needs of our children is an important task. This data is a necessary tool for all those working with youth, be it advocacy, media, service providers, or policymakers.

Children are a third of our population in Utah and 100% of our future.  
Let's make sure KIDS COUNT!

# U.S. Census Bureau, Household Pulse Survey, 2020

The Census Bureau's Household Pulse Survey was launched in April and has provided nearly real-time weekly data on how the unprecedented health and economic crisis of the COVID pandemic is affecting the nation. The KIDS COUNT Data Center has provided an easy to access look at this data at <https://datacenter.kidscount.org/data#UT/2/0/char/0/271>. Available data includes:

## Economic Well-Being Indicators

### Employment and Income

Adults living in households with children who lost employment income since March 13, 2020

Receiving pay for the time not working for adults living in households with children

Adults living in households with children who were employed in the past week

### Housing

Adults living in households with children who have little or no confidence in their ability to pay their next rent or mortgage payment on time

### Other Economic Well-Being

Adults living in households with children who sometimes or often did not have enough food to eat prior to the pandemic

Adults living in households with children who sometimes or often did not have enough food to eat in the past week

Adults living in households with children who had difficulty paying for usual household expenses in the past week

## Education Indicators

### School Age

Change in how households with children received education due to the coronavirus pandemic

Households in which a computer or digital device is usually or always available to children for educational purposes

Households in which internet and a computer or digital device are usually or always available to children for educational purposes

Provider of household internet services

## Health Indicators

### Health Insurance

Adults living in households with children who lack health insurance

### Other Health

Adults living in households with children who delayed getting medical care because of the coronavirus pandemic

Adults living in households with children who did not get needed medical care because of the coronavirus pandemic

Adults living in households with children who felt nervous, anxious or on edge for more than half of the days or nearly every day in the past week

Adults living in households with children who felt down, depressed or hopeless for more than half of the days or nearly every day for the past week

# Sources and Definitions

## Demographics

All demographics are from the American Community Survey 2011-2015 Estimates, U. S. Census Bureau.

## Health

Source - All sources are from the Utah State Department of Health unless otherwise indicated.

**Prenatal Care** - Number and percent of women receiving prenatal care in the first trimester as a percent of all live births.

**Low Birth Weight Babies** - Number of infants born weighing less than 2,500 grams (about 5.5 pounds) as a percentage of all live births.

**Infant Mortality** - An infant death is defined as death of a live-born infant within one year of birth. Rates are per 1,000 live births.

**Injury Deaths** - Child injury deaths are those occurring to individuals ages 1 to 19 due to injuries (accidents, suicides, and homicides). Rates are per 100,000 youth.

**Teen Births** - Live births to married and unmarried females ages 15 to 17. Rates are per 1,000 females in that age range.

**Suicide Deaths** - Rate for suicide deaths is per 100,000 ages 10-17.

**Uninsured Children** - The number and percent of children ages 0-18 with no health coverage. Source - American Community Survey.

**Immunization:** By two years of age, it is recommended that all children should have received 4 doses of diphtheria-tetanus-pertussis (DTP), 3 doses of polio, 1 dose of measles-mumps-rubella (MMR), 3 doses of Hepatitis B, 3 or 4 doses of Haemophilus influenzae type B (Hib) (depending on product type received), 1 dose of Varicella vaccine and 4 PCV. This recommendation is referred to in shorthand as "4:3:1:3:3:1:4." Source - Utah Department of Health, 2016 Immunization Coverage Report, <http://www.immunize-utah.org/pdf/2016ImmCovRpt/2016StateReports/2016CoverageReport.pdf>

**Oral health data** - National Survey of Children's Health

## Economics

**Poverty** - The federal poverty threshold for a two parent household with two children was \$23,283 in 2012. If a family makes less than this amount they are considered "in poverty." Source - U.S. Census Small Area Income and Poverty Estimates (SAIPE).

**Median Household Income** - Median income divides the income distribution into two equal groups, one having incomes above the median and the other having incomes below the median. It includes all income for the entire family. Source - SAIPE.

**Unemployment** - Seasonally adjusted unemployment rates. Source - Utah Department of Workforce Services (DWS).

**TANF & Food Stamp Cases** - The number of cases (households) receiving food stamps or TANF at any time during the month indicated. A case is counted once even though there may be several individuals in the household. Source - DWS.

**Intergenerational Poverty** - Intergenerational poverty is defined as poverty in which two or more successive generations of a family continue in the cycle of poverty and government dependence. Intergenerational poverty does not include situational poverty which is temporary and traceable to a specific incident or time period. Source - Utah Department of Workforce Service, IGP database.

**Children Under 6 With No Parent in Labor Force** - The share of children under age 6 whose resident parents are not in the civilian labor force. Kids Count Data Center

**Children in Low-Income Working Families** - The share of own children under age 18 living in families that met two criteria: (1) the family income was less than twice the federal poverty level; (2) at least one parent worked 50 or more weeks during the previous year. Kids Count Data Center.

## Education

Source - Utah State Office of Education.

**Enrollment** - Enrollment numbers are for the Fall of each year and represent the number of students enrolled in Kindergarten through 12th grade.

**Pupil/Teacher Ratio** - Pupil/Teacher ratios are based on the total number of students enrolled in Kindergarten through 12th grade and teachers include any person assigned to the school as a "regular classroom teacher." This excludes preschool teachers and special education teachers, guidance counselors, library specialist, etc. and does not include Charter schools.

**Free and Reduced Lunch Participation** - Data is for Kindergarten through 12th grade and represents the percent of the state's students who are receiving free or reduced lunches. Data is for a point in time enrollment number in October of each year.

**Chronic Absence** - Of students with at least 45 days in membership, the percentage that were absent for at least 10% of their days in membership. This is a new definition and makes the data in this year's book not comparable to other year's data.

**SAGE (Student Assessment of Growth and Excellence)** - The SAGE assessments are adaptive, meaning if a student answers questions correctly, the computer provides more challenging questions in order to measure the student's depth of understanding in his or her grade/course content. Similarly, the computer provides questions less challenging within the grade/course content when the student answers incorrectly.

**Children 3 and 4 Not Enrolled in Preschool** - The share of children ages 3 to 4 not enrolled in nursery school or preschool. "Nursery school" and "preschool" include any group or class of institution providing educational experiences for children during the years preceding kindergarten. Places where instruction is an integral part of the program are included, but private homes that primarily provide custodial care are not included. Children enrolled in programs sponsored by federal, state or local agencies to provide preschool education to young children--including Head Start programs--are considered as enrolled in nursery school or preschool. Source - Population Reference Bureau, analysis of data from the U.S. Census Bureau, 2011-13 three-year American Community Survey.

**Children under age 6 whose family members read to them less than 4 days per week.** Source - Kids Count Data Center

## Safe Communities

**Child Abuse** - The number is a distinct reported victim count. Victim counts across counties may be duplicated as a victim could have been serviced in more than one county. Rates are per 1,000 population. Source - Utah Department of Human Services, DCFS.

**SHARP Survey** - Student Health and Risk Prevention (SHARP) Statewide Survey. The survey is administered every two years, to students in grades 6, 8, 10, and 12.

Source - State of Utah Department of Human Services, Division of Substance Abuse and Mental Health.

**Disproportionate Minority Contact (DMC) data base** - Comprehensive definitions for this indicator can be found at [https://justice.utah.gov/Juvenile/ubjj\\_dmc.html](https://justice.utah.gov/Juvenile/ubjj_dmc.html)  
Source - Utah Board of Juvenile Justice, Utah Commission on Criminal and Juvenile Justice.

**Juvenile Justice Data** - Arrest numbers are collected by BCI through the Uniform Crime Reporting Program. These arrests include youths who were arrested and may be sent home with their parents and or guardian. - Court Referrals, Community Placement, and Secure Care numbers are collected by Juvenile Court through CARE, - Community Placement and Secure Care numbers represent dispositions. - Certain points of contacts have a share of youths whose race-ethnicity is unknown. These youth are not included here

# Notes

## Voices for Utah Children

Voices for Utah Children works to make Utah a place where all children thrive. We start with one basic question: "Is it good for kids?" At Voices for Utah Children, we believe that every child deserves the opportunity to reach his or her full potential. And to achieve this vision, we focus on five key areas that benefit the healthy development of all children. Health, School Readiness, Safety, Economic Stability, and Diversity.

Big wins for kids don't just happen by accident. They happen because of advocacy – when skilled professionals backed by thoughtful funders show policymakers that government can and should act to keep kids safe and help them grow. As a multi-issue child advocacy organization, Voices for Utah Children is making a difference in our kids' lives by raising awareness, influencing policy, and uniting our community. By bringing the power of a community together – legislators, business executives, private funders, government agency representatives, nonprofit directors, and ordinary citizens – we help identify and resolve the tough problems facing Utah's children and families.

## KIDS COUNT

KIDS COUNT®, a project of the Annie E. Casey Foundation, is a national and state-by-state effort to track the well-being of children in the United States. By providing high-quality data and trend analysis, KIDS COUNT seeks to enrich local, state and national discussions concerning ways to secure better futures for all children — and to raise the visibility of children's issues through a nonpartisan, evidence-based lens.
